

"A skunkworks project is a project developed by a small structured group of people who research and develop a project primarily for the sake of innovation"

ABOUT US

AI Skunkworks at Northeastern University is a group of people who research and develop Artificial Intelligence, Machine Learning, and Deep Learning projects primarily for the sake of innovation and learning to assist those exploring the edges of AI.

SCAN TO CONNECT

We stay ahead of the curve by leveraging creativity and expertise.

AI SKUNKWORKS

NORTHEASTERN
UNIVERSITY

PORTFOLIO

WORKSHOPS

Introductory to advanced level workshops such as Intro to Python, Github, Tensorflow and many more taught by our skillful members.

OPEN-MIC DISCUSSION

Small group discussions on new knowledge and applications of AI to brainstorm on new research ideas

HYPERPARAMETER DATABASE PROJECT

Develop database that allows users to visualize and understand how to choose hyperparameters that maximize the predictive power of their models.

JOBS DATABASE PROJECT

Develop a one stop solution to reduce the job search and talent acquisition stress levels using AI and ML to provide optimal matching work to talent

AI-ADDIN PROJECT

Reveal the logic and bias of models by exposing the reasons in their predictions using model interoperability algorithms

MENTORSHIP

Assist newbies in the world of data science, and AI by partnering with our experienced members
